Twinpro: universal and smart

The new Twinpro faucet line is based on an innovative design that exudes calm and clarity and whose environmentally friendly technology moderates energy and water consumption.

Uncompromising design – extensive selection

The Twinpro faucet line appeals with its architectural understatement and at the same time impresses with its stylish looks and user-friendly details. Thanks to its ergonomically shaped base, the single-lever faucet is both pleasant to hold and very easy to clean. A signature feature of Twinpro is its dynamically curved shape that creates a fresh, contemporary overall impression. Twinpro comprises a fully integrated bathroom collection in chrome with a single lever washbasin mixer and matching bathtub and shower mixers. Lovers of puristic architecture will appreciate the elegant bathtub and shower flush-mounted models based on the Simibox flush mounted system.

Guarantee of environmental friendliness

In many countries daily household needs account for around 160 litres of water per inhabitant. Thanks to the Ecototal control cartridge, up to 23 litres of water can be saved daily per person in the bathroom and kitchen. The volume and temperature limiters integrated on the Twinpro reduce water consumption by up to 30 percent and energy consumption by up to 33 percent.

What is Ecototal?

Ecototal is a special control cartridge with tactile feedback of the water temperature and flow rate. When moving the lever up or to the side, a palpable resistance is felt on leaving the energy-saving zone. Beyond this zone, higher temperatures and a maximum flow of water are available.

Benefits at a glance

- Smart resource-saving solution for private households
- Reduction of water consumption by up to 30 percent and of energy consumption by up to 33 percent.
- Limiting nubs can be removed separately.
- Long-serving and low-maintenance.
- Standard on many Laufen brand faucets.
